Marina Bay Yacht Harbor

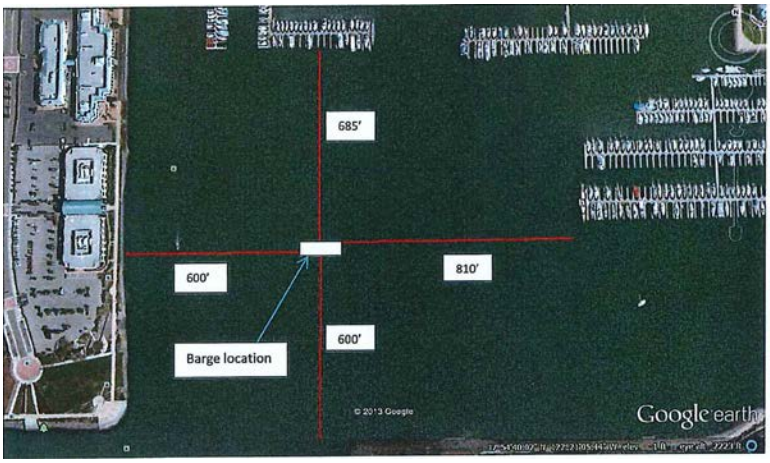
Marina Bay Tides

July 2016

Fireworks on July 3

Richmond is first on the Bay with fireworks! Enjoy the annual fireworks show from your boat, Sunday, July 3! We have been told that a new company has been hired so there won't be a repeat of last year's fiasco.

Fireworks are supposed to be launched from a barge in the marina at approximately 37° 54' 49"N 122° 21' 08"W as in previous years. Vessels will be prohibited from anchoring or operating within the exclusion zone before and during the show. Richmond PD Marine Unit will be patrolling the boundary so please give them your cooperation. Transit through the safety zone will be halted at approximately 8:00pm so make sure your vessel is in place prior to that time if you are not going to watch from your slip. Fireworks are scheduled to start approximately 9:15pm. All times are approximate of course.



NOTE: We will be restricting access to the E-Dock restrooms to tenants & their guests only. People without a key will not be given access.

Parking will also be an issue throughout the marina. Parking in Melville Square (E-Dock) usually fills up early & RPD may block access. Please display your permits! You may not get in at all without them! Come early & carpool with your guests.

Major Repair Projects

Waler Replacement: Routine waler replacement is scheduled to start in early August. F-Dock will see the mainwalk walers replaced from slip F-127 through F-183A. The End ties at F-274A and F-293A will also have their walers replaced. D-253 & D-253A will have their walers replaced as well as the G-Dock pumpout end-tie.

D-Dock Restroom Renovation: The long delayed renovation of the D-Dock restroom is scheduled to start mid-August. Work will run several months and will impact the availability of the laundry & ice machine as well as access to the restrooms.

Working on your Boat? Make sure nothing ends up in the water!

Marinas are under constant scrutiny and it is vital that whenever you are doing maintenance above decks on your vessel that you protect the environment. **Preventing ANY dust & debris from getting into the water is required!** Use tarps to create wind breaks and traps, use your shop vac attached to power tools and don't do work that will create dust topside when it is windy! If everyone does their part we can help forestall additional government regulations that will be an even greater burden. If you have any questions about the scope of your planned work please contact the Harbor Office in advance.

Check the weather conditions in the marina any time of day or night at: **http://weather.mbyh.com**.
