## New Power Centers & Dock Lights

As the Marina replaces power centers on the dock, the new power centers have a separate 20 Amp breaker that controls the dock light photocell. Please leave this breaker on at all times so the dock light will turn on when it gets dark.

It's a great practice to turn your shore power breaker off whenever you unplug but with the new power centers it is very easy to turn the light breaker off too. So please try to leave the 20 Amp breakers on whenever you unplug or turn your power off.

So far the Marina has installed about 150 of these new power centers throughout the marina so it will take a long while before we replace all the power centers in the marina. We will continue installing more of the new centers throughout the coming years.

## Electrical Safety

Please be extremely careful with electric heaters on board! Heaters and dehumidifiers can draw a very large load so be careful that you do not overload your boat's wiring. Also keep in mind that electric heaters can have a HUGE impact on your electric bill!

Carefully inspect all wiring and your shore power connections. As a reminder, all shore power connections must be UL approved marine type and the use of adaptors to connect household type extension cords is prohibited (adaptors are NOT UL approved). The Marina reserves the right to ban any cords we deem unsuitable.

And of course, never leave heaters on unattended!

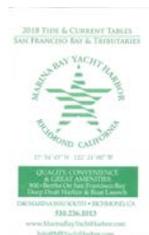

As Smokey the Boating Bear says:

"Only You Can Prevent Boat Fires!"

## 2018 Parking Permits

If you do not have a parking permit on the left read of your vehicle that looks like this (ie has "2018" on it) you risk having your vehicle cited and/or towed. 2017 permits are longer valid in 2018!

## 2018 Tidebooks

The 2018 Tidebooks are here. Copies are available at the Harbor Office and other key locations in the Marina.
