

# Marina Bay Tides

August 2021

## No Dock Storage Please!

Storing things on the dock is a safety hazard: The fingers are fire lanes and that space is needed for emergency access, so no storage is allowed on the dock.

From the berth agreement:

**5. STORAGE ON DOCKS.** Storage of items must be confined to the dock box or the boat and will not be permitted on the docks, finger piers, parking areas, etc. Walkways shall be kept clear at all times. Only approved dock boxes and dock stairs are allowed on the docks. . . Any unapproved items found on a walkway or finger pier will be removed and disposed of *at the owner's expense*. . .

Please remove all unauthorized items from the dock and fingers by your boat. This includes kayaks, dinghies, BBQs, Fuel jugs or other hazardous waste. **The maintenance staff may remove any unauthorized items from the docks without further notice** and you may be charged for the cost of removal and disposal of any unauthorized items on the dock.

Kayaks and dinghies may be stored in your slip (but not on the dock!). As a general rule they may not overlap the concrete but a small overlap of the wood walers is generally ok. The marina has kayak & dinghy storage space available for rent at the Launch Ramp.

If you need assistance moving your items or have a question about what is permitted, please contact the Harbor Office at 510-236-1013. Thanks in advance for everyone's cooperation.

## Exceptional Drought

Please cut back 10%

## Please Conserve Water

Please reduce your water consumption. East Bay Municipal Utility District is calling for a 10% reduction from all customers. Please use nozzles on hoses and when washing your boats, use buckets where ever possible rather than free-flowing hose. Take shorter showers (turn the water off while soaping up), don't allow the sink water to run while brushing your teeth or shaving. Also, please help the marina conserve by reporting leaks on the dock.

**After Hours Emergency: Call  
510-236-1013 Select Option 3**  
(you don't have to wait for the message to finish)

- Working on your Boat?
- Make sure nothing
- ends up in the water!

Marinas are always under scrutiny and it is vital that whenever you are doing maintenance above decks on your vessel that you protect the environment. **Prevent ANY dust & debris from getting into the water!** Use tarps to create wind breaks and traps, use your shop vac attached to power tools and don't do work that will create dust topside when it is windy! If you have any questions about the scope of your planned work please contact the Harbor Office in advance.
