

Marina Bay Tides

August 2022

Summer Safety:

No Dock Storage Please!

Storing things on the dock is a safety hazard: The fingers are fire lanes and that space is needed for emergency access, so no storage is allowed on the dock (other than dock steps).

Any stuff that the maintenance staff needs to remove may result in labor and disposal costs. (including stuff stored in/behind your dock steps).

No hanging over the Walkway!

Tie your boat up so your bow isn't hanging over the walk way no matter what the wind direction is. **Use Spring Lines!** Boats that need to be retied may be subject to labor costs.

Keep Your Shore Power Cords Out of the Water!

Make sure your cord is securely routed so it doesn't dip in the water when your boat moves about in the slip. Not only can this damage your cord but it can create a ground fault condition or other safety hazard.

Stage 2 Drought Conserve Water

Please cut back 10%

Please reduce your water consumption. East Bay Municipal Utility District is calling for a 10% reduction from all customers. Using nozzles on hoses is mandatory. Also, please help the marina conserve by reporting leaks on the dock.

- Working on your Boat?
- Make sure nothing
- ends up in the water!

It is vital that whenever you are doing maintenance on your vessel that you protect the environment. **Prevent ANY dust & debris from getting into the water!**

Use tarps to create wind breaks and traps, use your shop vac attached to power tools and don't do work that will create dust topside when it is windy!

Use drop cloths/drip trays etc. to prevent any paint/varnish/resin drips. If it gets on the dock, it's getting in the water!.

If you have any questions about the scope of your planned work please contact the Harbor Office in advance.

**Have you checked on your boat lately?
Schedule some time to give it some TLC!**
